

# Matrix 7

Versatile multi-mission configuration.

The Matrix 7 is the versatile multi-mission workhorse of the Matrix Architecture. Weighing under 2 lbs, it delivers 120 mph top speed and 6 lb payload capacity, making it ideal for a wide range of tactical applications from ISR to precision strike. The platform supports hot-swappable payloads and rapid reconfiguration between mission profiles without specialized tooling. Operators can transition from reconnaissance to direct action within minutes, leveraging the same ground control system and training pipeline used across the entire Matrix family. Its balanced performance envelope makes the Matrix 7 the most widely deployed variant in the lineup, trusted by units across multiple branches for its reliability and mission flexibility.

## TECHNICAL SPECIFICATIONS

WEIGHT	< 2 lbs
TOP SPEED	120 mph
PAYLOAD CAPACITY	6 lb
COMPATIBILITY	Full Matrix Architecture
